DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to a brake system and method of braking, classified in class 188, subclass 19.
- II. Claims 17-35, drawn to a handle assembly, classified in class 74, subclass 292.
- III. Claims 36-41, drawn to a frame assembly and method, classified in class 280, subclass 47.34.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-III have separate utility such as braking vehicles other than trailers (invention I), the trailer does not require the braking system or handle swivel to function as a vehicle, and the handle swivel can be used to control vehicles or devices other than the claimed brake or trailer. See MPEP § 806.05(d).

Art Unit: 3683

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
